Our 1040FS Die Cutter-Foil Stamper allows you to Foil Stamp & Emboss printed sheets, or Die Cut-Strip printed sheets. Always struggled justifying the ROI on a dedicated Stamper? Add additional Die Cutting capacity by "jumping" back and forth from Stamping to Die Cutting-Stripping work in about 10 - 15 minutes.

OFFLINE BLANKERS

Our Laserck Offline Blankers address the realities of increased wage rates, and the diminishing supply of skilled machine operators spanning North America currently.

Are your Die Cut run lengths too short to justify a Blanker? Do you have two, three or more temporary staff members manually stripping Die Cut pallets each shift? Let us help you automate the process; bypass long makereadies attributed with inline Blanking; eliminate expensive tooling; reduce labor staffing; and improve your finishing turnaround times.

BLK MODEL

Cycle Speed 55 seconds
Max. Lift 3.1”
Side, Tail Spacing 10 mm / 0.39”
Gripper Spacing 12 mm / 0.47”
Pallets/Hour 5 to 7 / 7,500+ sheets per hour
Makeready 15 minutes

Utilizing our Mark IV software in Pre-press, cartons are laid out on a printed sheet in a way that allows a series of upper and lower pins to separate finished cartons (pushed up) from waste scrap (forced down). Thereafter, finished cartons are delivered to the end of the BLK and are automatically palletized. The combination of just under 5,000 total pins allows your team to create nearly infinite templates, thus enabling you to place different designed cartons side-by-side on the same sheet. The (2) templates per job are made of paper board, and cost your team next to nothing.

Endless layouts. Zero tooling cost. Quick changeovers. Faster throughputs!

Company History

Since 1970, STOCK has been a leading producer of Sheet-to-Sheet Mounter/Laminating machines. STOCK’s product line ranges from 49” to 80” machine widths. Material thicknesses - for the carrier substrate - can range from 0.6 to 7mm with top sheets from 150 to 400 gsm (70# – 28pt). Upgrade options are available to support thicker top, and bottom materials.

STOCK’s modular design allows handled machines an easy upgrade path to semi-, or fully-automatic operation. With speeds up to 8,000 per hour, STOCK machines are depended upon for their accurate registration, tight tolerances, German manufacturing standards, and high quality finishing.
