**Male Blanking Tooling**

**Stripping Section**
Our 1040FS Die Cutter-Foil Stamper allows you to Foil Stamp & Emboss printed sheets, or Die Cut-Strip printed sheets. Always struggled justifying the ROI on a dedicated Stamper? Add additional Die Cutting capacity by "jumping" back and forth from Stamping to Die Cutting-Stripping work in about 10 - 15 minutes.

1040FS Foil Drive System feeds the foil in the same direction as the sheet, ultimately reducing foil waste.

**GRANITE** up to 72.75"

- Nonstop Pre-feeder as standard; supports Bobst Dies

**ZENITH** up to 82.5"

- Available with Pre-feeder, Makeready Table

**GIANT** up to 98"

- (2) Cameras as standard; available with optional EZ Feeder

Spike Infeed

Gripper Type
OFFLINE BLANKERS

Our Laserck Offline Blankers address the realities of increased wage rates, and the diminishing supply of skilled machine operators spanning North America currently.

Are your Die Cut run lengths too short to justify a Blunker? Do you have two, three or more temporary staff members manually stripping Die Cut pallets each shift? Let us help you automate the process; bypass long makereadies attributed with inline Blanking; eliminate expensive tooling; reduce labor staffing; and improve your finishing turnaround times.

Utilizing our Mark IV software in Pre-press, cartons are laid out on a printed sheet in a way that allows a series of upper and lower pins to separate finished cartons (pushed up) from waste scrap (forced down). Thereafter, finished cartons are delivered to the end of the BLK and are automatically palletized. The combination of just under 5,000 total pins allows your team to create nearly infinite templates, thus enabling you to place different designed cartons side-by-side on the same sheet. The (2) templates per job are made of paper board, and cost your team next to nothing.

Endless layouts. Zero tooling cost. Quick changeovers. Faster throughputs!
PRODUCTIVITY CASE STUDY

MANUAL STRIPPING

| Labor          | $880/8-hour shift  
> $22/hour  
> 5 manual strippers |
|----------------|-------------------|
| Output         | 880 pallets/month  
> 1 pallet/hour per employee (1,250 sheets)  
> 40 pallets/8-hour shift  
> 50,000 sheets/day |
| Total cost     | $19,360/shift per month  
> $19,360/additional shift |

LASERCK BLK

| Labor          | $176/8-hour shift  
> $22/hour  
> 1 machine operator |
|----------------|-------------------|
| Output         | 1,100 pallets/month  
> 6.25 pallets/hour per employee (7,834 sheets)  
> 50 pallets/8-hour shift  
> 62,672 sheets/day |
| Total cost     | $9,797/shift per month  
> $3,872/additional shift  
> (BLK + operator) |

IMPRESSIVE RESULTS!

- 50% Reduction in expenses (1-shift)
- 64% Reduction in expenses (2-shift)
- 25% Increase in capacity
- Consistency in Carton Blanking quality
- Stabilize employee staffing (outsourcing)
- Predictability in daily Carton Blanking throughput
- Eliminate tooling costs and storage
- Physical Asset on balance sheet
- Depreciation of capital expenditure

More DGM Products...

Carton Alignment
- Included as standard on all DGM Smartfold Classic, and Smartfold Ultra machines
- Dual - operator, and non-operator side registration system unlike other competitive Folder Gluer manufacturers

Ideal applications
Needed in commercial print, packaging, and trade finishing environments, or those using legacy upstream equipment

Carton Packers
- Automatically pack Straightline, 4-corner, and 6-corner cartons with the J-PACK
- Automatically pack Auto-bottom, and 6-corner cartons with the LOCPACK
- Contact us about simple, inexpensive Carton Packing models for ALL carton types

Ideal applications
- Straightline cartons
- Auto-bottom cartons
- 4-corner or 6-corner cartons
- Carton-Length(s): 1.57” – 18.89”
- Carton-Width(s): 1.57” – 16.53”

Beverage Carriers
- Servo, right angle technology
- Job changeover done in minutes vs. hours
- 10,000+ per hour production speeds
- Modern engineering to replace old, legacy machines!

Ideal applications
4-pack, 6-pack beverage carriers, and overnight mailer envelopes

F-1000 Classic
- 39.37” | 2-lane
- Up to 18,000/hour per lane
- Semi-automatic

F-1100 | F-1400 Universal
- 43.3” or 55.1” | 2-lane
- Up to 36,000/hour per lane
- Fully automatic

Founded in 1962, Kohmann have more than 2,000 machine installations worldwide, and offer three different performance models: the affordable F-1000 Classic; the mid-range F-1100 ECO; and the high speed F-1100 | F-1400 Universal.
Company History
Since 1970, STOCK has been a leading producer of Sheet-to-Sheet Mounter and Labeling machines. STOCK’s product line ranges from 49” to 80” machine widths. Material thicknesses – for the carrier substrate – can range from 0.6 to 7mm with top sheets from 150 to 400 gsm (70# – 28pt). Upgrade options are available to support thicker top, and bottom materials.

STOCK’s modular design allows handfed machines an easy upgrade path to semi-, or fully-automatic operation. With speeds up to 8,000 per hour, STOCK machines are depended upon for their accurate registration, tight tolerances, German manufacturing standards, and high quality finishing.
