

TR Die-Scoring System — offers the highest level of automation for high volume output

An extraordinary achievement, the TR System has revolutionized the industry with its single-pass die-score capability. Able to process up to 15,000 sheets per hour, The system perforates, scores, slits and, when combined with your existing 8 page Folder, it delivers finished product five times faster than conventional methods.

You can configure it to execute right-angle processing and a wide variety of cutting Heads will satisfy all of your custom needs. In addition to the speed and versatility of the TR System, you'll enjoy a higher quality finished product. Crisp scores and razor sharp cuts that are flawless.

Single-pass processing allows you to confirm exact placement of scores, slits, etc. within seconds. This higher level of Quality Control lets you confidently process challenging jobs. And on-the-fly adjustments can be made to compensate for inconsistent press sheets, virtually eliminating waste. Best of all, you'll save money because the TR Die-Score System simultaneously performs three tasks with one operator.
