## REALIZE INCREASED PROFITABILITY WITHOUT SACRIFICING QUALITY

Printers today are faced with increased pressures for finishing solutions. Adding a cost-effective Graphic Whizard XDC-530 MICRO UV coater to your range of solutions will make an impact on your customer.

The XDC-530 MICRO UV coater is a low-maintenance, ultra-violet light, curing coating system, which provides a durable and high-quality finish to your printed sheets. It also allows damage-prone materials to be immediately processed through the bindery. The XDC-530 MICRO is able to be hand-fed, or optional feeding devices are available.

The XDC-530 MICRO is easy to set up, user-friendly and its compact size makes it at-home in any environment. It is backed by a ONE-year warranty as well as your local Graphic Whizard dealer. Choose the XDC-530 MICRO for maximum productivity and profitability for years to come.
