Model 1528 and 1529 Folder Feeders

For folding of covers, cards, TV programs and signatures

- Up to 14,000/hr.
- Low-silhouette for easy loading
- Standard and reverse scoring
- Simple, wrenchless size adjustments
- Eliminates off-line folding of covers and cards
- Can be idled when not in use

- Highest folding accuracy — sharp, precise, clean fold
- Folding pressure adjustable on-the-fly
- Can be added to all Muller Martini saddle stitchers
- Feeds in chain running direction

The Model 1528 or 1529 Folder Feeder is placed in the first position to feed covers.

When used with universal base saddle stitchers Models 335 and 300, the Model 1528 Folder Feeder can be placed in the number one position for feeding covers or any other position to feed cards. For example, when placed in the fourth position, as shown above, the 1528 offers the unique flexibility to feed cards into the book, or to feed covers when stations 1, 2 and 3 are not needed for signatures. The 1528 Folder Feeder is movable and easily interchangeable with signature feeder heads.
