

# STERLING PUNCHMASTER

## FEATURES

U.S. PATENT NUMBER:  
6,799,498

See a video of The Sterling® Punchmaster® on our website, [www.spielassociates.com](http://www.spielassociates.com).

### STABBER

The Stabber stabs a lift of paper, adjustable between 2 and 30 sheets, and pulls the paper into the belts irrespective of wave curl, or static.

### LIFTER STABBER

The optional Lifter Stabber lifts the paper prior to stabbing. This is especially useful when punching thicker stock that can split.

### BELT LIFTER

When punching board or in the center of the sheet, the optional Belt Lifter raises the belts on the delivery side, eliminating scuffing.

### DRUM BYPASS

The optional Drum Bypass is a belt changeover system for heavy board. This will enable the sheet to be delivered without having to bend by traveling around the drum.

### DIE

The punch through Die allows for punching anywhere on the sheet, useful for windows, doorhangers & wrap around covers. The sheet passes through the die and then into the turn around drum.

### AIR FEEDER

The optional Air Feeder is designed to feed signatures, board, plastic, leatherette, or even pocket folders. It lifts one sheet or signature at a time, prior to feeding it into the belts.

### MICRO DIE ADJUSTMENT

The patented Micro Die adjustment allows you to "fine tune" the centering of a sheet. It can move the die side to side in increments less than .010 inches (.25 mm).

## SPECIFICATIONS

**maximum sheet size:** 20" x 20" / 50 x 50 cm  
**minimum sheet size:** 4" x 5" / 10 x 12 cm  
**power:** 220 Volts, single phase,  
12 AMPs, 2.6Kw  
**weight:** 2,500 Lbs. / 1110 Kg

## FLOOR PLAN
