# MODEL F

## DIE CUTTING MACHINE

*Accurate*

*Productive*

*Dependable*

*Economical*

*Simplicity*

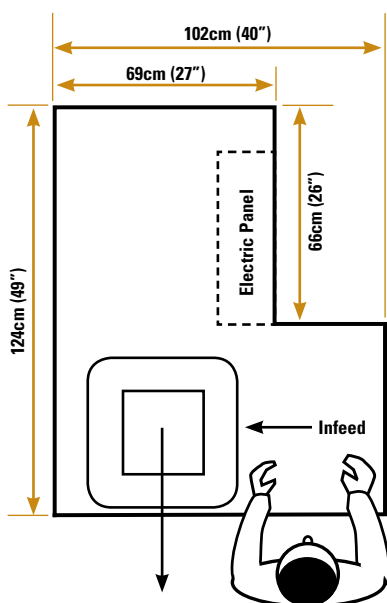

The solid design and simplicity of the PMC **Model F** makes this die cutting machine the number one choice for short run high output die cutting. This stand alone machine, with its rapid change over, offers an economical solution for producing a variety of accurate die cut products.

# MODEL F

## DIE CUTTING MACHINE

- ▶ Four-sided guiding system jogs and holds the stacks on all four sides during the die cutting operation for precise die cutting.
- ▶ Full control of stacks through feeding, guiding and die cutting eliminates manual jogging.
- ▶ Convenient adjustment of guides and die with clear view of die register on labels speeds set-up and reduces waste.
- ▶ Labels are safely loaded outside die cutting area.
- ▶ Typical uses: labels, note pads, credit cards, identification tags, postal cards, game cards, 3-way trim, round cornering.
- ▶ Materials: paper, plastic, vinyl, Mylar, paperboard.

### SPECIFICATIONS: MODEL F

Specifications	Model F
Maximum Pre-cut Size	184mm x 184mm(7.25" x 7.25")
Minimum Pre-cut Size	32mm x 32mm(1.25" x 1.25")
Maximum Die Cut Size	178mm x 178mm(7" x 7")
Minimum Die Cut Size	25mm x 25mm(1" x 1")
Recommended Trim	3mm (1/8") all sides
Stack Height	Up to 102mm (4")
Cycles per Minute	13
Electric Requirements	3 hp, 2.2 KVA, 3-phase
