Nearly 600 new & used listings at www.BestGraphics.net
Our Laserck Offline Blankers address the realities of increased wage rates, and the diminishing supply of skilled machine operators spanning North America currently.

Are your Die Cut run lengths too short to justify a Blanker? Do you have two, three or more temporary staff members manually stripping Die Cut pallets each shift?
Let us help you automate the process; bypass long makereadies attributed with inline Blanking; eliminate expensive tooling; reduce labor staffing; and improve your finishing turnaround times.

Utilizing our Mark IV software in Pre-press, cartons are laid out on a printed sheet in a way that allows a series of upper and lower pins to separate finished cartons (pushed up) from waste scrap (forced down). Thereafter, finished cartons are delivered to the end of the BLK and are automatically palletized. The combination of just under 5,000 total pins allows your team to create nearly infinite templates, thus enabling you to place different designed cartons side-by-side on the same sheet. The (2) templates per job are made of paper board, and cost your team next to nothing.

Endless layouts. Zero tooling cost. Quick changeovers. Faster throughputs!
# PRODUCTIVITY CASE STUDY

## MANUAL STRIPPING vs. LASERCK BLK
