The Label-Aire® Model 3111 makes labeling easier and faster...making you more profitable.

The Model 3111 Air-Blow labeler delivers on its promise of speed, accuracy, and ease of use. And that translates into lower operating costs and increased productivity for your business.

Advanced features include Velocity Compensation for improved label placement accuracy. Speeds of up to 1,500 inches (38.1 m) of web per minute and Zero Downtime Labeling allow your production to continue without costly interruptions. Label queuing and missing label compensation virtually eliminate unlabeled products.

Put this air-blow pressure-sensitive technology to work for you all day, every day. The Model 3111 Air-Blow labeler is built to meticulous quality standards and designed to withstand the most demanding operation.
