

SB-06

The HORIZON SB-06 Perfect Binder with six clamps is so designed to be used as a "stand-alone model" or to be expanded into an "in-line perfect binding and finishing" system when combined with Horizon HT-70 three-knife trimmer. Further, this system perfect binder provides you with a number of operation convenience features and productivity advantages for streamlining your bookbinding economy. For instance, you can bind 2,500 booklets per hour. You can bind booklets with thickness of up to 45 mm. Every safety feature in this machine conforms with the CE-Marking standards. Yes, Horizon SB-06 is a power system perfect binder!
