

No Heated Rollers

Eliminates offsetting on digital printing

Platen Plastic Applicator

Only heats tab extension

Quick Set-Up

Change size in 2 minutes

Straight Path

Maximum productivity

Great For Tradework

Maximum versatility for a variety of applications

SCOTTY 5000™

Laminate and Tab-Cut Automatically
Built by Scott for Legendary Endurance!

The Scotty 5000™

Automatically feeds, laminates and tab cuts products with the touch of a button. Turn around time is reduced while control of your job is maintained. You can save time and money while producing your materials in house for significantly less.

Your Best Option for Coated Materials- The **Scotty 5000** uses a platen plastic sealing system that heats only the tab extension and the adjustable dwell function allows you to hold the sheet for a pre-determined time. Therefore, some difficult stocks that require special handling are easier to run.

This machine is the machine of choice for trade binderies or any application where control of the materials provided for finishing are going to vary. It is an excellent machine for long or short runs. Adjustments for film lengths, tab size and position is precisely measured to .01 inches and is easily repeatable.

Dwell Function

This feature allows for ultimate control of seal time for the best results on coated materials where heated rollers will not work.

Handles Many Sheet Sizes

The extra long tool steel knives quickly and easily cut a one inch (25.4 mm) tab in the first position on a 14 inch (355.6 mm) long sheet. As the tab widens, or the tab position moves toward the center of the sheet, the sheet size capability increases accordingly.

Precision Cut A Variety of Tabs and Step-Cuts

Adjust tabs to any width from 1/2 inch to 5 inches (12.7 mm to 127 mm) by simply moving knives closer or farther apart.

KNIFE SIZES

English	Metric
1/4"	6.4 mm
3/8"	9.5 mm
1/2"	12.7 mm
5/8"	15.9 mm
3/4"	19.1 mm

Laminates using Scott Plastic Index Tab Film

SPECIFICATIONS

Model:	Scotty 5000	Counter:	1 - 999999
Speed:	Over 6000 tabs cut per hour Up to 4200 tabs laminated and cut per hour	Motor:	1 Horse Power
Sheet Size:	355.6 mm x 342.9 mm (14" x 13 1/2") maximum* 127 mm x 127 mm (5" x 5") minimum	Electrical Requirements:	30 Amps, 220 v single phase, 50 or 60 Hz
Plastic Size:	139.7 mm (5 1/2") maximum 25.4 mm (1") minimum	Air Requirements:	85 P.S.I.
Tab Cut Size:	127 mm (5") maximum 12.7 mm (1/2") minimum	Dimensions:	L-80" W-50" H-60"
Paper Load:	Approximately 2000 sheets	Shipping Weight:	2000 lbs (910 Kg)
		Warranty:	One year against defects in parts and workmanship

* For File Folders - a modification kit is available to do sizes up to 11" x 17 3/4"

There's responsibility that comes with being a leader.

It's that unique obligation to be there for your customers at all times and for all reasons. And Scott Office Systems fully embraces that responsibility.

As the unquestionable leading supplier of tab cutting, laminating and reinforcing machines as well as laminating film for index tab divider products, Scott Office Systems set its sights high from the very beginning. It's that commitment to excellence that has kept them at the top since the industry was born more than 40 years ago.
