

ASP 66/2-ME, 82/2-ME

MOBILE STREAM DELIVERY UNIT

with splitting device and pressing
Integrated marking device ME

The ASP 66/2-ME and ASP 82/2-ME is a mobile delivery unit for one- or two-up production and is ideal for sensitive products. Round belts at the infeed table allow splitting of multiple streams before the press. The large-capacity unit also allows integrated pressing with pre- and main pressing rollers.

Technical data and measurements
