ABOUT ITOTEC

Company Overview

- › Founded in 1919; sixth generation family owned
- › Over 100 years of manufacturing experience!
- › Based in Nagoya, Japan, home of Toyota and the country's industrial manufacturing
- › 55 employees
- › 1,000s of installs across North America
- › Leading manufacturer of super-duty, double arm Cutters and Cutting Systems

**NAGOYA,
JAPAN**

ITOTEC HISTORY

Company Overview

- 1919** – Started production and marketing of various bindery machines (mostly paper cutting machines) in Nagoya, Japan
- 1939** – Expanded factory to meet increasing demand
- 1974** – Additional factory built; became assembly and test operation facility
- 1976** – Exportation of Itotec Paper Cutter outside Japan
- 2003** – eRC series equipped with a color LCD touch panel was released; first in the world
- 2008** – 10,000th Paper Cutter was delivered
- 2018** – Introduced SC series at JGAS exhibition to succeed the eRC series
- 2019** – 100 year anniversary

WHY ITOTEC?

Company Overview

- › Superior cut capability: dual arm cut-and-clamp cutting process
- › Longer knife shear stroke
- › Chrome plated main and side tables
- › Consistent, lineal guided backgauge system
- › All knife adjustments from front of Cutter
- › Unmatched accuracy
- › High lift capability
- › Wide range of Cutters in sizes from 39" to 98", in addition to cut system solutions

SC SERIES CUTTERS

Machine Overview

Features –

- › Dual-arm clamp and cut system
- › Super duty, single piece frame & knife bar
- › Dual-gear boxes
- › Superior magnetic clutch/brake system
- › Longer shear stroke
- › Touch screen control interface

Options –

- › Gripper Transport systems (front or rear loading)
- › Automatic waste trim removal
- › Unloading systems
- › JDF/CIP4 technology

SC SERIES CUTTERS

Technical Specifications

	SC-82Z	SC-100Z	SC-115Z	SC-137Z
Cutting Width	32.28"	40.55"	45.98"	53.94"
Cutting Depth	32.28"	39.37"	45.67"	51.97"
Weight	5,500 lbs.	8,100 lbs.	9,000 lbs.	9,900 lbs.
Maximum Lift	5.12"	6.50"		
Minimum Cut	1.06"			
Knife Strokes per Min.	46	50		
Cut Memory	25,000			
Electrical	220V, 3-Phase, 30 Amp			220V, 3-Phase, 40 Amp
Dimensions (L x W x H)	6.9' x 6.5' x 5.1'	8.7' x 8.0' x 5.4'	9.1' x 8.5' x 5.4'	9.8' x 9.0' x 5.4'

ANCILLARY EQUIPMENT

Make it a System!

Lifts

Lifts work to increase efficiency. Stacking large finished sheets is nearly impossible in big lifts without a Lift as there is simply too much weight for the operator to lift. A Lift alone can increase productivity by 40-100%. Our AL-10 Lifts help to eliminate back injuries and improve morale in the cutting department.

Joggers

Our Kudo Joggers can increase Cutter productivity by 33%. With the ability to tilt left or right, Kudo Joggers can be placed on either side of your Cutter, or in the middle of (2) Guillotines. Air squeeze roller comes standard and scales are optional (for precision based environments).

Unloaders

Automating the downstacking process, our Itotec Unloaders can double your operator productivity. RU 5.0 Unloaders, for 45" and 54" Guillotines, can be designed in a right handed, or left-handed format. Modular in design, RU 5.0 Unloaders can be purchased in future years.

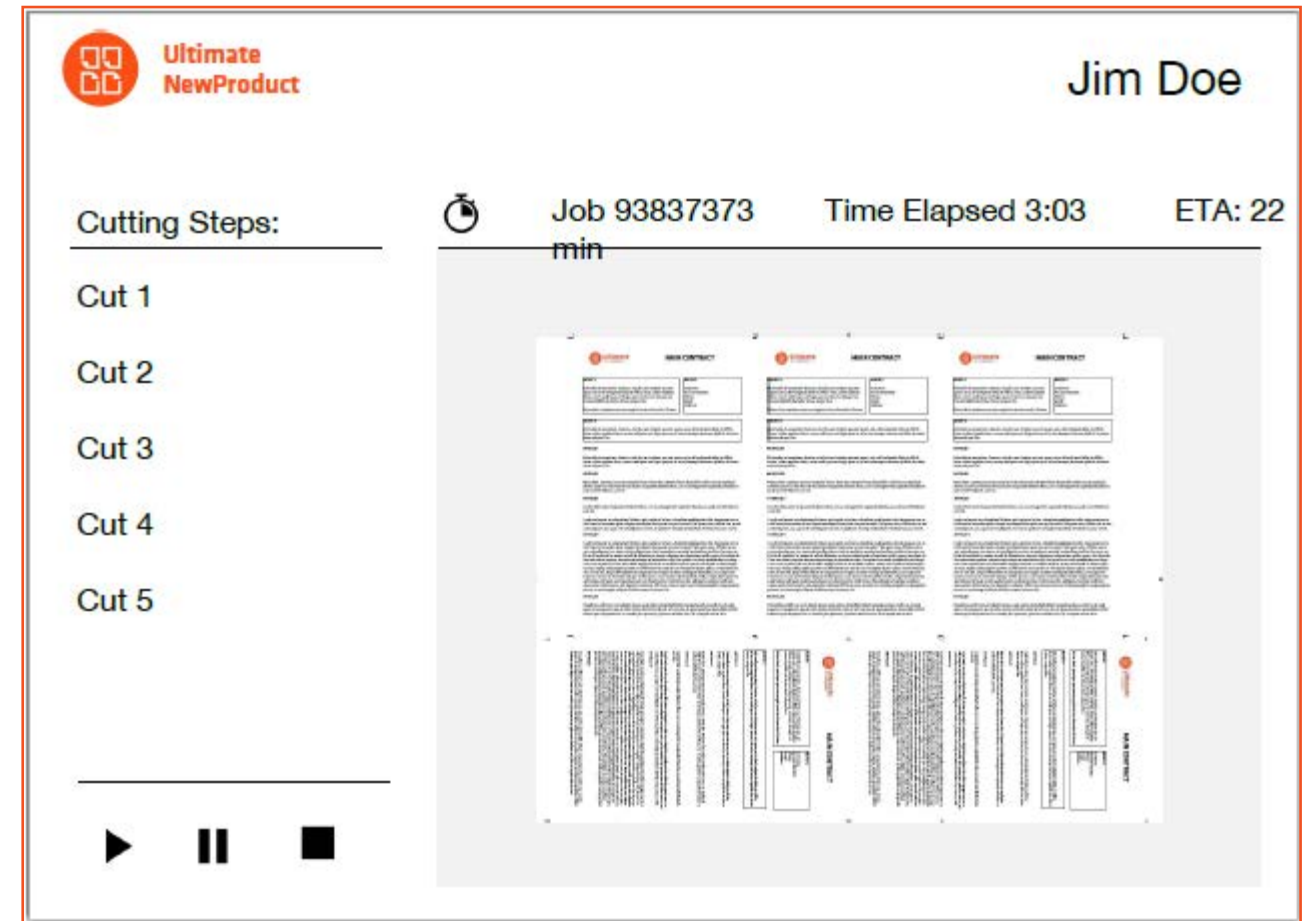

ULTIMATE BESTCUT

JDF Workflow Software

Best Graphics has partnered with Ultimate TechnoGraphics to equip our Itotec SC Series Guillotine Cutters with the aptly named **Ultimate BestCut software**. Using AI algorithms, BestCut simplifies the cut process by automatically planning the best cut sequence and advising the guillotine operator of the cut scenario to follow.

Streamline the cutting process with BestCut, your ultimate assistant in paper cutting operations. Designed to empower Paper Cutter Operators, this intelligent tool not only recommends the most effective cutting sequence but also vividly illustrates and animates each step for clarity and precision.

With BestCut, the burden of manual planning is a thing of the past. By automating the cut sequence, it significantly reduces the operator's workload, minimizing stress and the potential for human error. This enhanced efficiency translates to increased daily job production, faster turnaround times, and overall improved workflow.
