

## Itotec Guillotine Cutters - Since 1919

Itotec, manufactured in Japan, has been producing Paper Cutters and Ancillary Cutting equipment for over 100 years. Headquartered in the city Nagoya – home of Toyota – Itotec is a 6th generation family business with an install base of more than 12,000 Paper Cutters worldwide.

Best Graphics (Wisconsin, USA) is the importer, distributor and post-sales parts & service provider of Itotec equipment. Cast from single-piece frames, Itotec is proud to be identified as the original double-arm Paper Cutter.

Itotec's main competitor is, and always has been, Polar. However, Itotec Cutters outperform Polar Cutters in essentially every category. Here are some highlights:

- 1 Itotec Cutters are a double-arm pull design which results in: better pull strength per cut, less "draw", less total cuts, and longer lasting knives
- 2 Itotec machines are physically heavier than a Polar; we've not cut corners nor have we cheapened our models
- 3 Itotec Cutters are faster than Polar Cutters; 50 cycles per minute vs. 45 cycles per minute
- 4 We offer the industry's leading warranty: 5-year parts & 3-year labor, while Polar is reliant on spares, as a "profit center", for their long-term business model
- 5 Purchasing a Cutter from us will typically cost 25 - 33% less than a Polar Cutter
- 6 Company stability: Itotec is a 6th generation, family owned, and has never entered into insolvency
- 7 Polar has recently discontinued service and spare parts for machines as "old" as '04 and '06; we, Best & Itotec, are still servicing and supporting machines, here in the States, that are late '80s and early '90s in age
- 8 We're so confident in our Cutters that we'll back them with a 6-month assurance guarantee; if after 6 months, the machine is not performing to spec., we'll come back on site, refund your money, and haul away the gear
- 9 We take trade-ins; tell us "what you've got" and we'll reduce your total purchase price
