

Kompac Coaters - Since 1980

Kompac, manufactured in New Jersey, USA, has been producing Coaters for over 40 years. Kompac Coaters are available in three distinct series: the Kompac Elite, Kompac EZ Koat, and Kompac KwikFinish (Onyx).

The ONYX 30 is an nearline coating, priming, and die cutting system, providing a quick and easy way to apply UV, aqueous, primer/sapphire, and specialty coatings to a wide variety of substrates.

Kompac launched the Onyx 30 Dual Spot & Flood UV Aqueous Coating and Priming System in 2019. It take the same heavy-duty frames, cylinders, and construction from its' predecessor, the Kwik Finish 32, and combines it with a long list of improvements and upgrades to improve functionality.

Improvements and Upgrades

The following list contains the primary improvements and upgrades that were implemented with the Kompac Onyx 30:

1. The coating systems are now servo motor driven for better coating quality and longer life
2. A chambered anilox system is now available for running soft touch and matte coatings (optional)
3. The electronics have been completely redesigned with a 10" master touchscreen control for all functions
4. All safety guards have been redesigned for better access and visibility and are actuated by air shocks for ease of use
5. The high pile pallet feeder has been redesigned for easier service access and greater stability
6. The UV system has been completely redesigned for easier service access and greater stability
7. The exhaust blower has been enclosed for quieter operation
8. The system can now handle two IR drying systems for tough to dry aqueous jobs (optional)
9. The stacker has been redesigned with fully enclosed guarding and a new Light Substrate Kid for running thin stocks (optional)
10. The new stacker cooling module mounts above the stacker to cool aqueous coated sheets to prevent blocking (optional)
11. Die cutting, creasing, and perfining are now available and utilize a magnetic blanket with movable dies (optional)
