

# SPIEL DigiPunch—Automatic Punch

Production Sheet Punching for All Popular Mechanical Binding Methods

Smart Touchscreen Control

## AUTOMATION

The Spiel DigiPunch® is an economical high speed punch designed for short run binderies as well as digital and commercial printers. The machine allows for punching up to 72,000 sheets per hour! That's a big pile of paper for a small machine and a half million sheets per shift.

The Spiel DigiPunch® features a variable pile lift, which allows for slowing the machine down for difficult jobs, such as curled stock with static, or acetate (punched separately) or punch sheets with covers or tabs intermixed.

A touch screen offers complete automatic set up and automatic changeovers. The touch screen takes the guesswork out of the maintenance cycle by prompting operators when it is time to lubricate or sharpen the die. Unlike many other machines, it is possible to run the machine in reverse to clear jam ups.

Punch sheets from 4.5 X 5.5 inches to 12 X 14 inches for Plastic Coil, Double Loop Wire, Plastic Comb, Three Hole or any hole pattern.

## PRODUCTION FEATURES

- ◆ Punch Up To 72,000 Sheets Per Hour\*
- ◆ Auto Feeder Holds up to 2,500 Sheets of 20 lb. Paper
- ◆ Sheet Registration Prior to Punching
- ◆ Receding Stacker Delivery
- ◆ Punches Intermixed Stock weights; Tab Stock, Cover Stock (up to 160 lb. Index)
- ◆ Automatic Setup via Touchscreen
- ◆ Quick Punch Die Change
- ◆ Jam Detection & System Monitoring

\*Actual results will vary depending on number of sheets punched per lift (3-17 sheets) depending on stock type, stock weight and other variables such as sheet curl and static.

# SPIEL DigiPunch—Automatic Punch

## Imagine The Labor Savings; Punches up to 72,000 Sheets per Hour!

Small and portable, the DigiPunch was designed for short run binderies, digital and commercial printers but is also ideal for in plant shops and on demand printers.

## TOUCH SCREEN CONTROL

The DigiPunch's touch screen guides you through the entire punching process. You choose the paper size from a variety of presets or enter a custom size. Choose how many sheets you want to punch 3 to 17 sheets per lift, punching less for stocks such as acetate.

The computer will track the maintenance cycle of each die that is used, prompting when to lubricate or sharpen the die. It also prompts the operator when safety covers are open. The manual is contained in the touch screen computer with a variety of tips and tricks to make the operation of the machine quick and easy.

## QUICK CHANGE PUNCH DIES

Changing a punch die is fast and easy; simply unlock, slide out, then slide in and lock. The portable steel stand provides convenient storage of 2 additional dies. Punch dies available for all popular mechanical binding methods.

## FEATURE HIGHLIGHTS

3

4

5

6

- 1 **Paper Stabber**—stabs from 3 to 17 sheet sets
- 2 **Registration Table**—front & rear stops 2 side guides
- 3 **Receding Stacker**—punching stops with full stacker
- 4 **Punch Die**—change in seconds or deactivate pins
- 5 **Mobile Steel Cart**—convenient storage for 2 dies
- 6 **Waste Drawer**—large capacity, easy slide out

## Specifications

Minimum Sheet Size:	4-1/4" x 5-1/2" (5-1/2" punch side)
Maximum Sheet Size:	12" x 14" (14" punch side)
Paper Stock Weight:	Up to 160 lb. Index
Speed:	Up to 60 strokes per minute
Power:	115 volt AC / 2 amp
Dimensions:	47" L x 30" W x 48" H
Machine Weight:	510 lbs.
Shipping Weight :	860 lbs.
