JDF WORKFLOW SOFTWARE

Ultimate BestCut – JDF Workflow Software

Best Graphics has partnered with Ultimate TechnoGraphics, a leading provider of imposition software focused on automating imposition and finishing tasks in the printing industry, to equip our Itotec SC Series Guillotine Cutters with the aptly named Ultimate BestCut software.

Streamline the cutting process with BestCut, your ultimate assistant in paper cutting operations. Designed to empower Paper Cutter Operators, this intelligent tool not only recommends the most effective cutting sequence but also vividly illustrates and animates each step for clarity and precision.

With BestCut, the burden of manual planning is a thing of the past. By automating the cut sequence, it significantly reduces the operator's workload, minimizing stress and the potential for human error. This enhanced efficiency translates to increased daily job production, faster turnaround times, and overall improved workflow.

Proudly integrated with **Itotec Paper Cutters**, BestCut exemplifies cutting-edge technology. It serves as a seamless JDF interface, allowing you to automate your projects from start to finish with ease and accuracy. Choose Ultimate BestCut and redefine your cutting operations with smart, stress-free efficiency.

Eliminate Waste – cut every job the right way the first time

- AI Driven Cut Scenarios
- Easy to follow steps on screen
- Figures out the quickest cut scenario on even the most complex jobs

Eliminate the Bottle-Neck – tie in pre-press with cutting for peak efficiency

- Plug & Play approach to finish automation
- Easily integrates into prepress workflow
- Makes end-to-end workflow possible and profitable

Eliminate Cutting Time – ETAs you can count on

- Get an accurate ETA based on your cutting sequence
- Estimations based on level of skills of the Operator
- Look back at job history to find trends
